Bargain Buys Module Guide

1. Introduction:

Welcome to Bargain Buys, a light module that aims to enhance your store by displaying the three most affordable items for great deals and easy shopping. Perfect for attracting budget-conscious customers and boosting sales.

2. Requirements:

- **PHP version:** Version 8.1 or higher is recommended.
- **PrestaShop Compatibility:** Compatible with PrestaShop versions 1.7.0.0 through 8.99.99.

3. Installation:

- **Via PrestaShop Back Office:**
  - Navigate to the 'Modules' section in the back office.
  - Click 'Upload a Module' and select the module zip file.
  - Once uploaded, the module will automatically install.
- **Manual Installation:**
  - Unzip the module package.
  - Upload the module folder to your PrestaShop's /modules directory (using FTP or similar method).
  - Go to the 'Modules' section in your shop's back office.
  - Locate 'Bargain Buys' in the module list and click 'Install'.

4. Configuration/Usage:

- The Bargain Buys module is designed to be displayed in a three-column layout or a two-column layout with either a small left or a small right column. To ensure the module functions correctly and displays as intended, it must be used within these layout configurations

- Once installed, navigate to the design tab, click 'positions', locate the 'displayRightColumn' or 'displayLeftColumn' hooks, and position the module where you would like it. The module will appear on pages with supporting layouts.

5. Uninstallation:

- Go to the 'Modules' section in your shop's back office.
- Locate 'Bargain Buys' in the module list and click 'Uninstall'.
